

Paver-shield™

WITHOUT

Nicolock Paver-shield™

As pavers without Paver-shield™ wear, the thin veneer and color tint exposes aggregate over time making them appear faded.

WITH

Nicolock Paver-shield™

Pavers with Paver-shield™ have a tight, smooth surface texture and will not expose heavy aggregate as they wear. Ultra-dense surface has more color and more protection.

Nicolock has color from top to bottom throughout the paver ensuring a lifetime of beauty. Iron oxide pigments are **GUARANTEED** not to fade!

See the Difference

MORE COLOR... *More Life!*

CREATIVE SUGGESTIONS

THE OUTDOOR KITCHEN

An outdoor kitchen expands your living space and allows you to cook, eat and entertain without having to leave the comforts of home.

The first step in planning an outdoor kitchen is to think about what you really need. Carefully consider how you will use the space and what makes the most sense in terms of your existing home architecture and your existing outside configuration.

THE FIREPLACE

A fireplace or a firepit is an excellent way to extend your outdoor season into the cooler months.

In addition to the heat they provide, they're an economical light source when the days get shorter. Determining which fire feature to go with will depend mostly on your space, budget and preference.

It's not uncommon however for homes to have both a fireplace and firepit in the same yard.

CREATING HEIGHT

Pergolas add another level of height. Not only are they a beautiful way to frame an outdoor room, these shade structures also soften hardscaping and bring a sense of intimacy to an outdoor space.

Constructing your pergola on stone piers is a clever way to tie it into the overall hardscape design.

Layering height in a small or large space can have a dramatic impact on your hardscape design. Raised garden beds and pergolas can be used to create an intimate area around a firepit or seating area, while arbors, small trees and even garden art can help frame a view. Create more rustic looking height differences with the look of natural stone with our Belvedere collection.

WATER FEATURE

Water features can do more than add visual interest. Their bubbling sounds are soothing and their flowing water, hypnotic.

To maximize their soothing effect, plan to incorporate your water feature in a quiet spot where the running water is sure to be heard. However, the key is not to overwhelm your space with the feature. Subtly is the key to tranquility.
