EVERLOC™ 810 EXPRESS RETAINING WALL

Everloc™ is a lightweight, one square foot retaining wall system. Dress joints and radius edges create a three-piece, random appearance from one basic shape. System consists of a wall unit, corner, utility (to maintain bond at ninety degree outside corners) and a cap. Hollow core design and unique locking mechanism allows for quick and easy installation. Everloc™ is a user friendly system with little to no saw cutting due to its cutting edge corner and utility combo design.

- LIGHTER WEIGHT = FASTER INSTALLATION, LESS FREIGHT
- MULTI PIECE LOOK IN A SINGLE PIECE SYSTEM
- BIDIRECTIONAL LOCKING MECHANISM ASSISTS IN ALIGNMENT AND INSTALLATION SPEED

EVERLOC™ 810 EXPRESS RETAINING WALL

**NOTE:** All walls over 2’ in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
