The Firma® Wall is a segmental retaining wall with a natural split-face texture. Its classic line complements any natural or architectural landscape. A solid block with tapered sides, this wall system combines rich color, form and function into your project.
NOTE: All walls over 2’ in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
