MINI COLONIAL WALL

The Mini Colonial Wall System features a distinctive double-sided face, offered in hard-split rock face finish. It is available in three face lengths and includes corner units (packaged on a combined pallet). You can build the Mini or 6” wall individually or combine them for added dimension. There are also prepackaged Colonial Pier kits to complement your walls.
NOTE: All walls over 2’ in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
