The Trinity® Wall is a pinless, square foot block designed for small and large engineered applications. Trinity’s vertically aligned core allows for efficient and complete stone fill. Its single sided face is available in three color mixes to enhance any environment with functional design and beauty. Special order.
**NOTE:** All walls over 2’ in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
