Stone Ridge

The three modular sized stones in each pallet allow you to install Stone Ridge in either a random or staggered running bond pattern befitting of the look. Stone Ridge’s beautiful surface texture and color is fortified with our exclusive Paver-Shield protection.

Nicolock’s Stone Ridge pavers have the texture of natural cut flagstone.

available colors:
- adobe blend
- golden brown blend
- granite city blend
- crab orchard blend*
- oyster blend*
- travertina blend*
- pennsylvania blue**
- rusty blue blend**

* denotes premium color
** denotes deluxe color

**INSTALLATION GUIDELINES**

After excavation, compact the subgrade and install a woven separation fabric. Spread and compact a base of clean, graded, dense aggregate (road base). Typical compacted base thickness is 4-6” for pedestrian applications. Pavers are set on a loosely screeded 1” bed of graded, clean concrete sand. Maintain a joint size of 1/16” – 3/16”. When pavers are set, compact paving stones into sand with mechanical plate vibrator. Joint sand may be spread over paving stones during compaction. Installed pavers should be set 1/8” to 1/4” above final elevations to compensate for any potential settlement. Spread clean dry sand over surface and broom sweep to fill joints.

**CAUTION: ALWAYS USE A PLATE COMPACTOR WITH A PAD WHEN INSTALLING STONE RIDGE OR ANY OTHER TEXTURED PAVING STONE.**

**NOTE:** Warranties expressed or implied by Nicolock do not apply to the possible occurrence of efflorescence which does not affect the structural integrity of the paving stone. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.

All measurements are nominal. Dimensions include the joint widths when fully installed. Variance can be up to 5% depending upon joint width.

---

**Paver-Shield™** is an advanced manufacturing technology that concentrates the highest grade of cement, a selection of the finest sands, and the most vibrant pigment available on the surface to create a durable, color-rich paver. Paver-Shield completely eliminates the exposure of large and unsightly stones from wear or the use of harsh de-icing salts. Pavers made with Paver-Shield have color from top to bottom, not a thin veneer. Nicolock is the only manufacturer that offers surface protection and color throughout using Paver-Shield technology. Paver-Shield ensures a lifetime of rich color!
