Everloc™ is a lightweight, one square foot retaining wall system with dress joints and radius edges that create a three-piece, random appearance from one basic shape. The system consists of a wall unit, corner, utility (to maintain bond at ninety degree outside corners) and a cap. All shapes utilize Everloc’s™ Lug-and-Groove mechanism.

- LIGHTER WEIGHT = FASTER INSTALLATION, LESS FREIGHT
- MULTI PIECE LOOK IN A SINGLE PIECE SYSTEM
- BIDIRECTIONAL LOCKING MECHANISM ASSISTS IN ALIGNMENT AND INSTALLATION SPEED

Everloc™ 810 Express retaining wall shown in Beige/Brown

### Available Colors:
- Beige/Brown
- Charcoal/Buff
- Charcoal/Grey

### Notes:
- All walls over 2' in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
