Experience Outdoor Living
COME HOME TO NICOLECK.

Nicolock pavers have a full, structural lifetime warranty* and are transferable to the next owner should you sell. Register your products it in 3 easy steps!

Go to Nicolock.com

Fill Out the Warranty Form.

Upload Proof of Purchase.

Click on the warranty link on the top right hand corner on our homepage.

LIFETIME WARRANTY*

Nicolock provides a limited lifetime warranty on the structural integrity of its manufactured product used in residential applications. Nicolock pavers are warrantied for as long as you own your home and are transferable to the next owner should you sell. Nicolock products installed in accordance with our guidelines and industry standards that are deemed to be structurally defective will be replaced with product of equal value. Removal and replacement labor cost is not the responsibility of Nicolock. Regarding de-Icing products, Nicolock recommends sand for slip resistance as it is the most environmentally friendly product for use on concrete products to make sure surfaces are skid and slip resistant. If a de-icing product is used, Nicolock recommends using only NaCl (rock salt) and should be used sparingly, following the manufacturer’s instructions. Once ice is loosened, remove immediately to avoid buildup of the de-icing agent. De-icing agents of any kind are not recommended for our Nicostone line.

Color matching and product availability are not guaranteed. Proof of purchase and/or installation contract must be made available prior to or at the time of inspection by an authorized Nicolock representative. Other exclusions apply.

nicolock.com | A COLOR for every home
WELCOME TO NICOLOCK

For more than 60 years Nicolock has been trusted to help homeowners and contractors like you in achieving their perfect home project. From technological advances such as our paver shield™ technology, to our advanced color blending technique, Nicolock continues to lead the way in the production and supply of quality concrete products and outdoor living solutions. We are proud to say that we are 100% U.S. owned and operated.

Using select materials, our rigorous attention to quality-control during the entire manufacturing process guarantees product consistency and allows us to offer you a lifetime warranty on our products.

We know and trust that you will love your Nicolock products. We are excited to introduce new and innovative products this year while continuing to bring you our superior line of pavers, wall systems and outdoor living lines.

THE PAVER-SHIELD™ DIFFERENCE

Nicolock's patented paver shield™ manufacturing process delivers a paver surface that is tight and dense, not coarse and grainy like other products.

More importantly, paver shield™ ensures that the aggregate needed to give the paver its strength is never exposed, giving you years of “it looks like new” enjoyment. All Nicolock pavers have color from top to bottom, ensuring a lifetime of beauty and protection. Iron oxide pigments are guaranteed not to fade.

A COLOR FOR EVERY HOME

Need inspiration for that elegant front entry or backyard paradise? Just take a look at Nicolock pavers and wall systems. We have more rich colors than anyone in the industry. Our products are warm and vibrant the moment they arrive at your home and will stay looking that way year after year.

Our superior color blending means that your finished project will have variegated tones, not defined blotches here and there. We minimize the risk for a bad installation with our proprietary manufacturing technology and unmatched color blending. Unlike some of our competitors, our color extends through the entire paver, not just the surface layer, ensuring the most vibrant color available in the market!

We are committed to bringing you the best quality products so that you and your family can enjoy a lifetime of memories. With almost 1,000 different combinations of shape, color and texture, Nicolock has the broadest selection of products in the industry to satisfy every hardscape need.

We stay ahead of the field by continuously introducing new, trend-setting products to our customers. By following design trends both here and overseas, we’re able to maintain our position as a market leader. We have such high confidence in the quality of our products that we back them up with a transferable limited lifetime guarantee.

A LIFETIME OF INNOVATION

We’ve invested millions in the most technologically advanced manufacturing equipment available to produce hardscape products that exceed the standards of the industry and those of the most discriminating buyer. Our commitment to innovation is evident not only in our rigorous attention to quality but also in the expansion of our product lines. From kitchens to fire features you will find multiple options to create a space that is uniquely yours.

ENVIRONMENTALLY FRIENDLY

We manufacture several variations of eco-friendly paving products, allowing storm water to percolate back into the soil. And since all of our hardscaping products are made from natural materials, they can be recycled at the end of their very long life like glass, metal, and plastic.

WE’RE LOCAL

Nicolock facilities, retailers and contractors cover the Mid-Atlantic and Northeast regions of the United States and are always “close to home.” We have manufacturing facilities on Long Island, New Jersey, Maryland and Connecticut, as well as, strategically placed distribution centers. We pride ourselves on our responsive service, terrific product availability and superior on-time delivery.

PROFESSIONALS YOU CAN TRUST

Nicolock Hardscape Pro Contractors have been pre-screened to make sure that the best products get the best installation. Locate one through our on-line locator at nicolock.com. Our sales representatives are industry certified and experts in the field of hardscaping. They serve as technical advisors to all of our customers, including retailers, contractors, design professionals and homeowners.
Nicolock sources the highest class of raw materials in the industry to give each paver the very best in quality and consistency. Our patented process features a smooth, ultra-dense surface and rich vibrant color guaranteed not to fade.

Our unique, state-of-the-art manufacturing process ensures that all of our quality materials are precisely measured out to create a consistent, extremely durable base mix which is the foundation of every Nicolock paver.

During this process, iron oxide bonds with cement molecules resulting in the most vibrant color seen throughout each paver.

Once our base mix is created, ultra-fine sand, Portland cement and additional color come together to create our paver-shield™ technology.

The result is a tight, smooth surface texture combined superior color, strength and beauty that will last for generations!

paver-shield™ Technology
Tight, smooth surface texture that is built into the paver.

Ultra dense base mix featuring color throughout the paver ensuring a lifetime of beauty that stands up to harsh weather.

WHY PAVERS

APPEARANCE
Available in many colors and styles, paving stones are made to complement the architectural style of your home and your personality.

DESIGN VERSATILITY
When it comes to design, pavers can be used for just about any project including walkways, patios, pool surrounds, roof decks and fire features.

DURABILITY
Tough enough to withstand the harshest elements and easy to care for, pavers are a great choice. Pavers are rated to be four times as strong as a typical concrete slab and unlike poured concrete, won’t crack from ice heaves or invading tree roots.

VALUE
Paving stones are considered to be one of the few hardscape products that instantly add value to your home. The cost of concrete pavers is substantially less than other hardscape materials and provide an equally attractive appearance.

MAINTENANCE
Concrete pavers are easier to maintain and last longer without needing to be repaired. If a paver becomes stained or broken, it can be easily replaced individually without disturbing other pavers.
WHY NICOLOCK

NICOLOCK HAS THE MOST BRILLIANT COLORS IN THE INDUSTRY
Nicolock pavers have the richest, most vibrant colors and come in a wide array of styles to harmonize with your home’s exterior.

NICOLOCK MAKES SHAPING YOUR SPACE EASY
With our borders and accents you can create the appearance of a larger space or design a tranquil oasis to escape to after a long day. Bring your outdoor projects to life with Nicolock.

NICOLOCK WITH PAVOR-SHIELD™ TECHNOLOGY IS ENGINEERED TO LAST!
Quality materials are precisely mixed to create our proprietary paver-shield™ blend. Nicolock pavers are a perfect choice for residential driveways, backyard patios and commercial applications.

NICOLOCK PAVERS PROVIDE IMMEDIATE GRATIFICATION
Additionally, they provide longer term return on investment when decide to sell your home. Whether it’s curb appeal from a welcoming path to your door or an additional living space from a patio and outdoor kitchen, we have everything you need to build those sought after amenities.

NICOLOCK PAVERS ARE LOW MAINTENANCE AND EASY TO KEEP CLEAN
Just sweep and or rinse with warm soapy water. If a paver becomes damaged, it’s easy to replace without disturbing the stones around it.

nicolock.com | A COLOR for every home
Expand your living space with Nicolock's PVC Square Pavers. Ideal for driveways, patios, and retaining walls, they are available in a variety of styles and colors to enhance your home’s landscape.

Nicolock is committed to providing exceptional products and services. We manufacture, market, and sell high-quality paving stones and retaining walls. With Nicolock, you can transform your outdoor living space into a beautiful, functional, and long-lasting extension of your home. Experience the Nicolock difference today!

Step In Style...
Using color, Inlays, borders and paving stone direction to ENHANCE YOUR OUTDOOR SPACE

Creating that WOW factor is easy to achieve when you incorporate Nicolock’s design fundamentals into your project. Add a beautiful border when you designing your new patio, pool-scape, driveway or any outdoor project. Create a striking visual by using contrasting colors and different shaped paving stones. There are many options when considering with regard to paver laying patterns. We have chosen some a few examples of laying patterns on the next few pages to help guide you through the process. You can even mix and match different styles, shapes and patterns to create unique and interesting designs.

PAVER DIRECTION
Laying pavers at a 45 degree angle creates the illusion of space with an added richness to a basic installation.

BORDERS
Borders define edges and softly combine large areas that would otherwise be toneless. Monochromatic or contrasting colors help define your style.

INLAYS
Inlays allow you to define a space within your outdoor space. Often created with contrasting colors and textures inlays add visual interest to make your space pop.

Creating that WOW factor is easy to achieve when you incorporate Nicolock’s design fundamentals into your project. Nicolock custom kits give you everything you need to get your project started. From dimensions, material lists and contractor drawings to garden and patio furniture recommendations. For additional information on our predesigned packages, visit us at nicolock.com/predesignedpackages.

SHOW STOPPER
The Show Stopper kit includes everything you need for entertaining including the Verona Grill Island, the Verona Fireplace, Alpine Ridge paver-shield™ pavers and accented with a Rustico border.

TRADITIONAL
The Traditional includes our Stone Ridge XL paver-shield™ pavers with a Rustico 6x9 border, a place for your grill, a table area, a separate conversational seating area, and the Verona Fire Pit Kit.

CHEF SERIES
Create the ideal summer kitchen with The Chef Series. Our custom kit includes our Verona Kitchen Kit, Verona Fire Pit Kit and Stone Ridge paver-shield™ pavers with a Rustico 6x9 inlay.

MODERN FLAIR
Our Modern Flair contemporary kit includes three separate seating areas including one with our Verona Fire Pit Kit and our larger, more modern styled Alpine Contemporary paver-shield™ pavers with The Montauk border.
Relax in style with the Madison Circle Design. With a small patio off the back of the house, a Serafina Fire Pit installed over a Ridge Circle off to one corner, this backyard has everything you need to turn on the grill and enjoy some quality time.

Thermal Finish Flagstone used as stepping stones on each side lead you to this charming outdoor space that has it all including a Verona Fire Pit, and a beautiful inlay to frame the border.

The ultimate small space backyard, the Outside Empire package offers mirrored patios with Roman corners separated by a see through Kalea Bay Fireplace.

Dine in the shade with the Liberty Square design which includes a beautiful patio with a decorative inlay, a Nicolock 13’ x 16’ Pergola Kit and our new ClifRock Kitchen Island. This design combines efficiency with practicality.

Thermal Finish Flagstone used as stepping stones on each side lead you to this charming outdoor space that has it all including a Verona Fire Pit, and a beautiful inlay to frame the border.
Brilliant color can always be found in Nicolock pavers with paver-shield™. Rich vibrant colors are the hallmark of everything we make. With Nicolock’s paver-shield™ technology, colors stay rich and vibrant. From rustic to contemporary, we have a color pallet to complement every home. When choosing Nicolock, you are receiving pavers with color from top to bottom and a tight, smooth surface. Our pavers will not expose heavy aggregate as they wear. The ultra-dense surface has more color and more protection, ensuring a lifetime of beauty.
STONE RIDGE COLLECTION | One of our top selling pavers, Nicolock Stone Ridge Collection is a stunning choice for patios, walkways, pool decks and much more!

Circles and Inlays

Old Town Flagstone Circle | Color: Bluestone

A complete circle pack on a pallet! Naturally aged and textured surface with an authentic character of reclaimed flagstone in a circular design with stone cut edges.

Wetherdale Circle | Color: Gironde

Wetherdale circle creates a 10’- 9” circle with a shallow riven surface and stone cut edges. Creating an intimate patio space has never been so easy.
OLD TOWN FLAGSTONE
QUARTERED SQUARE PATIO PACK

This classic design features a series of rectangular bands of slabs running out from a single central unit and radial lines that provide the quartered effect. Although visually complex, it is easy to create a 9 foot square as the mitered corner is in fact a single unit. Authentic character of reclaimed flagstone in a circular design with stone cut edges.

G. Geo-textile Fabric (Design Option)
H. Uncompacted Subgrade
I. Underdrain Design Option

Eco-Ridge | Color: Granite City Blend
Nicolock manufactures several variations of eco-friendly paving stones. These products allow storm water to percolate back into the soil rather than run-off into sewers and waterways. In addition to being environmentally friendly, these pavers may help you to maximize the property by creating a more permeable surface area to meet government requirements.
ECO-RIDGE 80MM | An oversized brick shape with a slightly textured riven surface. Slightly chamfered edges with a 3% open surface area. Joint opening which is compliant with the Americans with Disabilities Act. (ADA)

Walls are no longer just used for functionality; today, they are becoming increasingly more diverse and expressive. When it comes to choosing the perfect wall to suit any style, look no further than The Nicolock Wall Collection. We make it easy to choose the perfect wall for any residential or commercial installation. The chart on the following page will help you determine structural needs. Once you decide, you’ll find numerous style options and an exceptional pallet of colors to choose from.

Look for Nicolock, where beauty, durability and functionality meet.
Nicolock Walls are available in a variety of styles and include features designed for multiple applications. To help you select the best wall for your installation, please review the chart below. Additional information is included on each product page.

*Wall heights shown are intended as a guide and not for construction purposes. Consult a qualified engineer for design assistance. Note: Gravity walls rely on unit weight and unit set-back to retain soils. Reinforced walls rely on unit weight, unit set-back and geogrid to retain and stabilize soils.
Belvedere Wall | Color: York Brown
Outdoor areas of any size or shape will be transformed with Nicolock’s Landscape Wall Collection. Nicolock has the perfect selection of walls that will not only bring definition to your outdoor space but also work in harmony with the colors of our pavers. Strength, beauty and functionality are the hallmarks of Nicolock’s wall stones, so you can build with confidence.
**COLONIAL WALL SYSTEMS**  
The charming Colonial Wall System features a distinctive double-sided face, offered in hard-split rock face finish. It is available in three face lengths and includes corner units (packaged on a combined pallet). You can build the 3” or 6” wall individually or combine them for added dimension. There are also a prepackaged Colonial Pier kits to complement your wall.

KODAH WALL | Kodah Wall is a one-of-a-kind large scale retaining wall system. Its modern, linear proportions combined with its rough, quarried stone texture make it perfect for a variety of applications. The Kodah Wall also makes it easier than ever to provide you with the big block look without the over the top installation costs.

Nicolock’s retaining walls are available in a wide variety of styles and colors, offering numerous design possibilities. Our retaining walls can be used to create a barrier to prevent erosion or capture additional outdoor space by leveling the grade that might otherwise be uneven or sloped. Typically, a retaining wall may be part of a system that includes geogrid and may require engineering. You can count on Nicolock’s residential and commercial retaining walls to add natural beauty to any outdoor space.
The Firma® Wall is a segmental retaining wall with a natural split-face texture. Its classic line complements any natural or architectural landscape. A solid block with tapered sides, this wall system combines rich color, form and function into your project.

Everloc™ 810 Express Wall

Everloc™ is a lightweight, one-square foot retaining wall system. Dress joints and radius edges create a three-piece, random appearance from one basic shape. System consists of a wall unit, corner, utility (to maintain bond at ninety degree outside corners) and a cap. Hollow core design and unique locking mechanism allows for quick and easy installation. Everloc™ is a user friendly system with little to no saw cutting due to its cutting edge corner and utility combo design.

GARDEN WALLS

Whatever Nicolock garden wall style you select, you will have a variety of sizes and colors to choose from. The addition of a garden wall can help provide visual interest, acting as a border between an installed feature and the rest of the landscape. Garden walls are low walls and not meant to withstand the weight or pressure of soil. They are best suited for tree rings, edgings and garden borders.
SIERRA WALL | A beautiful 4” x 12” wall that has a soft-split face texture and a rear lip connection. This single-sided wall system has tapered sides and a 1” setback per course.

Choosing your package is easy. Start by selecting your burn type (Wood, Smoke-less or Gas), then select from our various options.

**WOOD**

The Standard Wood option is for fire lovers who appreciate the full aesthetics of burning wood. Choose your coping option for added height and contrasting finish; add optional grates to complete your outdoor sanctuary.

**SMOKE-LESS WOOD**

SMOKE-LESS fire pits work through a double-wall, smoke reduction design. When a fire is burning, the walls heat up and hot air rises and exits the wall cavity through the line of holes around the rim. This pressurized, heated oxygen mixes with the smoke and causes it to re-burn, reducing smoke.

**GAS**

Nicolock's gas options make it easy to add a gas burning fire pit to your outdoor living space. Whether you prefer propane or natural gas, each ignition type includes everything you need to experience season-round enjoyment day or night.

OUTDOOR LIVING

OVATION FIRE PIT | Every season is the season for the Ovation. Easily installed, the Ovation can create warmth and ambiance at your home tonight!

VERTICAL PANEL TECHNOLOGY

Vertical Panel Technology is the smart alternative to block and stone masonry. Reinforced concrete panels and easy installation process makes constructing outdoor living spaces quick and affordable. This technology enables you to choose the texture, profile and color palette to fit the natural landscape of any backyard or outdoor setting. Reduce material waste and environmental impact, while delivering the highest quality vertical masonry structures.

</tr>
<tr>
<td>TRLD44 LP or NG</td>
<td>45(\frac{1}{4})” (w) x 11” (h) x 20” (d)</td>
</tr>
</tbody>
</table>

The TRL is a fully loaded workhorse, a grilling classic packed with luxury features. Complete with interior lights, exterior LEDs, a rear infrared burner, full rotisserie set, flame thrower valves, easy-clean briquette burner covers and plug-and-play infrared sear zone options, the TRL makes professional grilling easy. With a commercial-grade stainless steel construction and 16-gauge stainless steel burners backed by lifetime warranty, this grill is built to last.

SIZZLER BUILT-IN GRILL SERIES

<table>
<thead>
<tr>
<th>MODEL</th>
<th>CUTOUT DIMENSIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIZ26 LP or NG</td>
<td>23(\frac{3}{4})” (w) x 8(\frac{1}{2})” (h) x 20(\frac{3}{4})” (d)</td>

<tr>
<td>SIZ40 LP or NG</td>
<td>38” (w) x 8(\frac{1}{2})” (h) x 20(\frac{3}{4})” (d)</td>
</tr>
</tbody>
</table>

Quality you can afford. The latest addition to the Summerset line, the Sizzler Series is a premium product at an unbeatable price. Constructed in all #443 stainless steel and designed with careful precision to ensure optimal airflow and even heating, this grill gives its higher-priced competitors a run for their money in both durability and grilling performance. The Sizzler will impress the most discriminating of grillers.

SIZZLER PRO BUILT-IN GRILL SERIES

<table>
<thead>
<tr>
<th>MODEL</th>
<th>CUTOUT DIMENSIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIZPRO32 LP or NG</td>
<td>30(\frac{3}{8})” (w) x 8(\frac{1}{2})” (h) x 20(\frac{3}{4})” (d)</td>

<tr>
<td>SIZPRO40 LP or NG</td>
<td>38” (w) x 8(\frac{1}{2})” (h) x 20(\frac{3}{4})” (d)</td>
</tr>
</tbody>
</table>

The all new Sizzler Pro Series packs tons of features on top of quality construction and affordability. Upholding the same sleek design as our classic Sizzler along with the added Exterior LED Lights, this grill really sets itself apart. The interior has also been revamped with 14,000 BTU Cast Burners, Heat Zone Separators and Interior Cooking Lights to make for a premium grilling experience from top to bottom. The best part is... it won’t break your wallet.

ALTURI BUILT-IN GRILL SERIES

<table>
<thead>
<tr>
<th>MODEL</th>
<th>CUTOUT DIMENSIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALT30 LP or NG</td>
<td>28(\frac{3}{4})” (w) x 10(\frac{3}{4})” (h) x 23(\frac{3}{4})” (d)</td>
</tr>
<tr>
<td>ALT36 LP or NG</td>

<tr>
<td>ALT42 LP or NG</td>
<td>40(\frac{1}{4})” (w) x 10(\frac{3}{4})” (h) x 23(\frac{1}{4})” (d)</td>
</tr>
</tbody>
</table>

The Alturi Series can be summed up in one word – luxury. Designed with elegance, fueled with raw power and loaded with every feature, this grill sets the bar for luxury outdoor cooking. Details like the angle-mounted interior lights, rotisserie storage and spring-assisted hood provide ultimate convenience, while its solid #304 stainless steel construction and high BTU Red Brass burners – the most durable in the market – guarantee lasting performance. When it comes to performance, quality and style, Alturi truly stands alone.

AMERICAN MUSCLE GRILL | AMG BUILT-IN GRILL SERIES

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Charcoal, lump charcoal, wood chunks, natural gas, liquid propane, pellet fuels – all of it! With the American Muscle Grill, get the flexibility of a multi-fuel chameleon with the raw power of a champion that outclasses any of its single-fuel challengers. With its creative Multi-Fuel Tray System, grilling with any combination of solid fuels places innovation in the chef’s hands. Offering a robust 110,000 BTUs of grilling horsepower, take advantage of the convenience of gas or simply use it to ignite those solid fuels in seconds. The AMG is the top performer in any class, the only question left is how big?
Take your outdoor kitchen to the next level with the Summerset Beverage Center. Complete with a 40 lb. ice compartment, sink, towel holder, blue front panel LED lighting, speed rail with condiment tray and built-in bottle opener.

Do you get tired of making multiple trips indoors while grilling and enjoying your outdoor space? Bring the comfort of ice-cold beverages and cold storage to your outdoor kitchen with a Summerset Refrigerator. Featuring pristine form and function of #304 stainless steel door construction, maintain a matching design with your existing Summerset components. The locking stainless steel door keeps your cold storage safe and energy efficient, and it is reversible to best adjust to your workflow and use. Offering durable construction for the outdoors, a sealed back for energy efficiency, temperature control and adjustable legs for leveling and rear venting.

To see the complete line of Summerset Products ask for the Summerset Catalog.
NICOLOCK
2 NEW COLORS FOR 2019

OCEANIC 5
The first 5 color blended concrete paver! Oceanic 5 captures the subtle grays and blues of the ocean to create tranquility in your hardscape design. A beautiful blend of our most sought out colors that will complete your dream project.

PECONIC 6
Introducing the first 6 Color Paver in the market! Peconic 6 fuses the luminosity of Nicolock’s most popular shades from subtle grays to vibrant tans; with just the right amount of contrast to make it the perfect color for your outdoor oasis.

PAVER INSTALLATION

MATERIALS NEEDED
- Gloves
- Tape Measure
- Stakes
- Shovel
- 3 lb. Hammer
- Levels
- Line Level
- Carpenters Square
- String Line
- Broom
- Wheelbarrow
- Pry Bar
- Wire Cutters
- Mason’s Chisel
- Markers
- Screed Board
- Two 1” o.d. Screed Pipes
- Plate Compactor
- Paver Cutter
- Diamond Blade Table Saw

Materials Needed
- Gloves
- Tape Measure
- Stakes
- Shovel
- 3 lb. Hammer
- Levels
- Line Level
- Carpenters Square
- String Line
- Broom
- Wheelbarrow
- Pry Bar
- Wire Cutters
- Mason’s Chisel
- Markers
- Screed Board
- Two 1” o.d. Screed Pipes
- Plate Compactor
- Paver Cutter
- Diamond Blade Table Saw

The use of an approved safety mask is recommended when cutting any concrete products.

A. Compacted Sub-Base
B. 4” - 6” Compacted Aggregate
   (for Pedestrian Traffic)
C. 8” - 12” Compacted Aggregate
   (for Vehicular Traffic)
D. Edge Restraints
E. 1” Bedding Sand
F. Pavers

BEFORE YOU BEGIN
Your dealer can assist you in obtaining the necessary materials and equipment needed to complete your paving stone installation.

*Three color blends are not recommended for projects less than 500 sq.ft

Lay out your entire paver pattern prior to cutting any stones.

Find an area away from your installation to cut pavers. Concrete dust created by saw cutting pavers can stain the surface.

The use of an approved safety mask is recommended when cutting any concrete products.

1. PLAN
Determine the area to be paved. Measure for square footage and sketch a diagram of the shape & pattern of paving stone desired.

2. PREPARE / EXCAVATE
Before beginning excavation, make sure there are no utility lines within the area to be paved. Excavate area to the proper depth depending on the type of traffic.
3. GRADE  
Establish the finish grade and slope or pitch of pavement to allow for drainage. Lay out the lines and corners with string line and stakes. Compact sub-base.

4. PREPARE / EXCAVATE  
Spread aggregate base uniformly throughout the entire excavated area and 8 in. beyond perimeter lines. Base aggregate material should be processed 3/4” minus gravel or crushed concrete blend.

5. BASE COMPACTION  
Compact the base aggregate evenly throughout the area with a mechanical plate compactor. Do not compact the base aggregate in more than 4” layers. The compacted base should conform to the contour of the finished paved area. The grade of the base aggregate should be 3” to 4” below the finished paving stone surface depending on the thickness of the paver.

6. EDGE RESTRAINTS  
Install edge restraints as required. Pavers butting against curbs or foundations will not need an edge restraint. Various types of edging materials can be used. Nicolock recommends a Snap Edge edge restraint system since it is easy to install and will not rot or decay.

7. BEDDING  
Spread 1” of concrete sand evenly over the compacted base. Screed the bedding sand to a level, smooth surface using a screed board. For areas wider than the width of the screed board, use 1” conduit pipe as screed guides 4’ apart. Screed sand, remove screed rails & fill in depressions with fresh sand. You should end up with a complete layer of smooth sand. Do not disturb sand bed after it has been screeded.

8. PAVER PLACEMENT  
Begin placing paving stones on the screeded sand bed in the desired pattern. Hand place the paving stones with a hand tight joint. Work from the paving stone side of the installation as they are set. To achieve the best mixture of colors and blends, remove pavers from delivered bundles section by section, not layer by layer, and work from several bundles at a time. Cut pieces as needed to fill in the pattern.

FINISHING  
When complete, sweep surface clean. Spread a fine jointing sand over the entire surface and broom sweep to fill all joints. Leaving excess sand on the paving stone surface, tap the paving stones into the setting bed with the mechanical plate compactor with a rubber pad. Broom sweep more sand to fill any open joints. Finally, backfill over the top edge restraint and grade. Your installation is now complete and ready for use.
**RETAINING WALL INSTALLATION**

**Materials Needed**

- Gloves
- Tape Measure
- Stakes
- Shovel
- 3 lb. Hammer
- Levels
- Line Level
- Carpenters Square
- String Line
- Broom
- Wheelbarrow
- Pry Bar
- Wire Cutters
- Mason’s Chisel
- Markers
- Screed Board
- Two 1” o.d. Screed Pipes
- Plate Compactor
- Paver Cutter
- Diamond Blade Table Saw

**NOTE:** The following Installing procedures apply to all Nicolock retaining wall units constructed as a conventional gravity wall system.

**PREPARING/EXCAVATING:** Before beginning excavation, make sure there are no utility lines in the wall area. Excavate area to the proper depth. For geogrid-reinforced retaining walls or for more detailed information, consult your local distributor or contact Nicolock.

For most non-critical walls (and under favorable soil conditions) Nicolock wall units are constructed as a conventional gravity wall system. Walls up to 3 feet in height (2 ft. 6 in. for Sierra) are attainable without the need for soil reinforcement (geogrid). Recommended installation procedures should be followed to ensure the life of your wall structure.
1. SITE PREPARATION AND EXCAVATION
Excavate a trench a minimum of 6” beyond the front and back of the wall block. Dig trench 9” to 14” deep, enough to create a 6” thick leveling pad and to bury at least one whole wall block below grade. Compact the soil at the bottom of trench. Shape the slope behind wall to allow for 12” of drainage material.

2. INSTALL LEVELING PAD
Place filter fabric in trench and up the cut slope. Fill trench with clean, graded aggregate and compact.

3. PLACE BASE COURSE (FIRST ROW)
Position a level string line at the straight face of the unit to maintain alignment. Place the wall units side by side in the center of the prepared base. Bury the first course of block below grade to a depth equal to 10% of the height of the wall or a minimum of 6”, whichever is greater. Level units from side to side, and front to back.

4. DRAINAGE SET-UP
Fill the space in front of wall with clean fill to grade to hold units from shifting. Place a perforated pipe behind wall on top of base for drainage. Fill any block cores and the drainage area with clean aggregate keeping filter fabric in place. Backfill soil on outer side of fabric and compact.

5. STacking UNITS
Place successive courses by fitting the keys and grooves onto the units in the row below (if applicable). Keep the tops of each course clean to maintain a level surface. Stack units one layer at a time in a running bond pattern (crossing joints). Utilize geogrid when the wall height is 3 ft or more or as required by the project engineer or approved design drawings.

6. PLACE GRAVEL AND BACKFILL MATERIALS
Continue building the wall to the desired height. Backfill with clean aggregate behind each course as completed. Backfill and compact soil. Finish the wall by securing the wall cap with a suitable masonry adhesive.

Note: Illustrations shown are not for construction purpose. Please confer with your local engineer for proper placement of geogrid.

Important: Walls higher than 36” above grade, terraced walls, weak soils, and other loading conditions require special considerations in design and construction. This should be done by a qualified engineer & a professional contractor. Check with your local building department for code requirements.
STAIN REMOVAL

The stain removal methods suggested here are merely a guide and may not work to your satisfaction in all instances. Nicolock is not responsible for any damage caused while using these methods. Nicolock recommends that you keep several pavers from your initial installation available to replace any pavers that become damaged or excessively stained or soiled.

ALGAE & FUNGAL GROWTHS
Apply a fungicide according to manufacturer recommendation.

BEVERAGE STAINS
Scrub the stain with hot soapy water. For stubborn stains apply a 1:10 diluted sodium hypochlorite solution (household bleach) use according to the manufacturer’s recommendations.

CHEWING GUM
Chewing gum is best removed with a suitable aerosol freezing agent before scraping it off. Use according to the manufacturer’s recommendations.

FRESH OIL STAINS
Soak the oil up with an absorbent cloth or paper towels. Do not wipe. Then cover the affected area with a ‘dry’ absorbent powder and leave for 24 hours. Repeat until the powder has absorbed all or as much of the oil as possible.

If a stain persists, apply a recommended cleaner according to the manufacturer’s recommendations.

PAINT /WOOD-STAIN /VARNISH
Soak up the spillage with an absorbent cloth or paper towels. Do not wipe. The stained area should be immediately scrubbed with scouring powder and water.

The stained area should be immediately scrubbed with detergent and water. Paint removers or solvents should not be used on stains that are less than a week old, as this will increase penetration into the concrete. Scrape off as far as possible. Apply an appropriate proprietary paint remover, preferably one supplied as a thick gel. Follow the manufacturer’s recommendations or contact the paint manufacturer.

WOOD PRESERVATIVES /CREOSOTE
Soak the wood with mineral spirits and scrub with a hot detergent and water. Finally rinse thoroughly with clean water, or contact the manufacturer of the preserver.

ASPHALT & EMULSIFIED ASPHALT
Chill with ice (if warm outside), scrape away & scrub the surface with scouring or abrasive powder. Rinse with water.

CUTBACK ASPHALT & ROOFING TAR
Use a soft, moist putty made with talc or diatomaceous earth (available wherever pools supplies are sold.) Mix with kerosene, scrub, let dry and brush off. Repeat as needed.

CANDY, KETCHUP, MUSTARD, GREASE DRIPPINGS FROM FOOD
For stubborn stains, apply liquid detergent full strength and allow it to penetrate for 20-30 minutes. Scrub and rinse with hot water. Removal is easier if these stains are treated immediately.

CAULKING
Scrape off excess and scrub with denatured alcohol. Rinse with hot water and detergent. For acrylic latex caulk - follow guidelines for removal of latex paint.

CLAY SOIL
Scrape off dry material, scrub and rinse with hot water and strong detergent.

CREOSOTE
Apply a solution made with paint thinner and talc. Scrub and allow to dry. Scrape off, scrub with scouring powder and rinse with water.

MORTAR
Let dry but do not harden and carefully remove spots with a trowel, putty knife or chisel.

LEAF, WOOD ROT OR TOBACCO STAINS
Apply household bleach diluted 10:1 with water (10 parts water) and scrub with a non-metallic stiff bristled brush.

OIL OR GREASE THAT HAS PENETRATED
Mop up any excess oil with rags. Cover the area with oil absorbent t alc, (kitty litter). Diatomaceous earth can also be used. Leave it on the stain for a day, then sweep up.

PAINT
Fresh paint should be mopped up immediately with rags or paper towels by blotting. Do not wipe as this will spread the paint and extend the job of removal. If the paint is latex and water-based, soak and then scrub area with hot water, scouring powder, and a non-metallic stiff brush until no more improvement is seen. Let the remaining paint dry and remove as described below.

DRIED PAINT
Scrape any excess oil-based paint, varnish or water based latex paint off the surface. Apply a commercial paint remover and let sit for 20-30 minutes. Loosen with gentle scrubbing. Do not rub the loosened paint into the surface of the pavers. Instead, blot up the loosened paint and thinner. Repeat as necessary.

TIRE SKID MARKS
Scrub black area with water, detergent and scouring powder.

ABOUT EFFLORESCENCE:
Efflorescence is a whitish, powder-like deposit that may sometimes appear on the surface of the paving stones. It may appear immediately or within a short time after installation. Left alone, normal wear and exposure to the elements will dissipate the efflorescence. Efflorescence does not affect the structural performance or durability of concrete pavers. Efflorescence is a normal occurrence in cement based products, as well as many colored paving products. Because it is a natural reaction to the proper hydration of concrete, Nicolock accepts no responsibility or liability for replacement.

If there is a need to remove the efflorescence before it naturally wears away, best results are obtained by using an efflorescence remover which is available from most mason supply dealers. Do not use muriatic acid.

If a sealer is to be applied to the paving stones, it is recommended that any presence of efflorescence be removed prior to sealer being applied. For installations over a new or existing concrete base, a cementitious setting bed, or with mortared joints, the occurrence of efflorescence is more likely. Precautions for proper drainage of the paving stones system should be taken to minimize this occurrence.

WHAT IS EFFLORESCENCE?
Efflorescence is a natural phenomenon and can occur with any cement based product, as well as other paving products. It may appear randomly and will possibly appear more pronounced on colored paving slab.

The white bloom may give the impression that the color of the paving slab is fading but, when wet, you will find that the efflorescence vanishes and the paving slab returns to its original shade. The white bloom will often return again when the paving slab dries. Be assured that efflorescence has no detrimental effect on the performance of the paving slab and will generally disappear with time.

HOW DOES EFFLORESCENCE OCCUR?
All concrete products contain cement which produces water soluble calcium oxide (lime).

Concrete paving materials contain millions of tiny invisible pores; when moisture penetrates into these pores – either from rain, dew or condensation – it dissolves part of the lime to make calcium hydroxide.

When the slab dries out, the calcium hydroxide rises to the surface and reacts with the carbon dioxide in the air, sometimes leaving a white bloom of calcium carbonate once the water has evaporated.

WILL EFFLORESCENCE DISAPPEAR NATURALLY?
Yes. The efflorescence action is arrested by carbon dioxide reacting with calcium oxide within the pores of the concrete. The efflorescence itself is then, over a period of time, either converted back to soluble salts and washed away by rain or simply disappears through the action of trafficking, snow or ice.

Once the efflorescence has disappeared naturally it does not usually recur. It is therefore not necessary to replace the paving or to take other measures against efflorescence.

HOW LONG WILL EFFLORESCENCE LAST?
This is difficult to predict as factors such as climate, location and conditions (damp/shady or open/sunny) are variables which can affect the extent of the phenomenon. However, on average, it can take from 12 months to 24 months to disappear.
**FAQ**

**WHY DO NICOLOCK PAVERS MAKE THE BEST PAVEMENT?**

Not only are Nicolock pavers beautiful, but they provide the best pavement solution in freeze/thaw conditions, when installed over a compacted aggregate base. Installation over a compacted aggregate base results in a pavement that is strong, yet flexible enough to move as the ground shifts without breaking apart, rutting or heaving. In addition, they can be “unzipped” to allow for repairs or access to utility lines. Unlike asphalt and other surfaces, pavers are virtually maintenance-free. And, by definition, concrete pavers are about 3 times stronger than regular poured concrete.

**WHAT MAKES PAVER-SHIELD™ BETTER THAN THE COMPETITION?**

*Paver-shield™* is not a thin veneer of color coating. *Paver-shield™* pavers are guaranteed to look great year after year, retaining their vibrant color and smooth texture. Products without *paver-shield™* may look worn and faded over time with exposed aggregate on the surface.

**DOES THE COLOR GO ALL THE WAY THROUGH NICOLOCK PAVERS?**

All Nicolock pavers have color throughout. Those manufactured with our exclusive paver-shield™ process have an extra concentration of cement and pigment on the wear layer providing deep rich colors and a smooth, dense wear layer.

**CAN I USE A PRESSURE WASHER TO CLEAN MY PATIO?**

Yes – but, as always, follow the manufacturer’s instructions carefully. Do not pressure wash your patio too strongly or too frequently as you may damage the surface of the paver.

**CAN PAVERS BE INSTALLED OVER A Poured CONCRETE BASE?**

Absolutely! Provided certain steps are taken. Care must be taken so that water does not pool underneath the pavers. Drainage holes should be drilled in large slabs and filled with pea gravel and covered with landscape fabric. Edge pavers must be restrained to keep joints from opening up.

**CAN I USE A SEALER ON MY PATIO?**

Yes – check proprietary manufacturer’s instructions and suitability for sealing concrete paver. Please note: applying sealant to paver may affect the color.

**HOW DO PAVERS COMPARE WITH PATTERNED CONCRETE?**

Patterned concrete pavements are slabs of concrete that are embossed with a pattern. Therefore, they are prone to the same problems with freeze/thaw cycles, namely cracking and spalling. Also, unlike Nicolock pavers, patterned concrete pavements don’t allow access to underground utilities or the ability to make repairs. At virtually the same price installed per square foot, Nicolock Pavers are clearly a superior choice.

**HOW DO I DETERMINE HOW MUCH STONE BASE MATERIAL AND SAND SETTING BED MATERIAL I NEED?**

One half ton of modified stone or sand will cover about 100 square feet at 1” thick. Using a 10’ x 10’ (100 square feet) patio as an example, you would need 1/2 ton of sand for the setting bed (1” thick) and 3 tons of modified stone for the base (6” thick). You’ll need about 5% more sand for the joints between the pavers. The thickness of the base material depends on the application and subgrade soil conditions (use a thicker base for poorly drained soils). As a rule of thumb, you’ll need 4” to 8” of base material for walkways and patios, and 8” to 12” for driveways and parking lots.

**I HAVE WHITE DEPOSITS ON MY PAVERS/WALLS. WHAT IS IT?**

You are probably referring to efflorescence, a natural and common occurrence in many concrete products. Efflorescence occurs when natural salts come to the surface and leave behind a white deposit that can normally be brushed off. This is not a product defect or harmful to pavers and walls and Nicolock accepts no liability for its occurrence. It will usually weather away with time.

**WHAT MAKES PAVER-SHIELD™ BETTER THAN THE COMPETITION?**

*Paver-shield™* is not a thin veneer of color coating. *Paver-shield™* pavers are guaranteed to look great year after year, retaining their vibrant color and smooth texture. Products without *paver-shield™* may look worn and faded over time with exposed aggregate on the surface.

**DOES THE COLOR GO ALL THE WAY THROUGH NICOLOCK PAVERS?**

All Nicolock pavers have color throughout. Those manufactured with our exclusive paver-shield™ process have an extra concentration of cement and pigment on the wear layer providing deep rich colors and a smooth, dense wear layer.

**CAN I USE A PRESSURE WASHER TO CLEAN MY PATIO?**

Yes – but, as always, follow the manufacturer’s instructions carefully. Do not pressure wash your patio too strongly or too frequently as you may damage the surface of the paver.

**CAN PAVERS BE INSTALLED OVER A Poured CONCRETE BASE?**

Absolutely! Provided certain steps are taken. Care must be taken so that water does not pool underneath the pavers. Drainage holes should be drilled in large slabs and filled with pea gravel and covered with landscape fabric. Edge pavers must be restrained to keep joints from opening up.

**CAN I USE A SEALER ON MY PATIO?**

Yes – check proprietary manufacturer’s instructions and suitability for sealing concrete paver. Please note: applying sealant to paver may affect the color.

**HOW DO PAVERS COMPARE WITH PATTERNED CONCRETE?**

Patterned concrete pavements are slabs of concrete that are embossed with a pattern. Therefore, they are prone to the same problems with freeze/thaw cycles, namely cracking and spalling. Also, unlike Nicolock pavers, patterned concrete pavements don’t allow access to underground utilities or the ability to make repairs. At virtually the same price installed per square foot, Nicolock Pavers are clearly a superior choice.

**HOW DO I DETERMINE HOW MUCH STONE BASE MATERIAL AND SAND SETTING BED MATERIAL I NEED?**

One half ton of modified stone or sand will cover about 100 square feet at 1” thick. Using a 10’ x 10’ (100 square feet) patio as an example, you would need 1/2 ton of sand for the setting bed (1” thick) and 3 tons of modified stone for the base (6” thick). You’ll need about 5% more sand for the joints between the pavers. The thickness of the base material depends on the application and subgrade soil conditions (use a thicker base for poorly drained soils). As a rule of thumb, you’ll need 4” to 8” of base material for walkways and patios, and 8” to 12” for driveways and parking lots.

**I HAVE WHITE DEPOSITS ON MY PAVERS/WALLS. WHAT IS IT?**

You are probably referring to efflorescence, a natural and common occurrence in many concrete products. Efflorescence occurs when natural salts come to the surface and leave behind a white deposit that can normally be brushed off. This is not a product defect or harmful to pavers and walls and Nicolock accepts no liability for its occurrence. It will usually weather away with time.

**WHAT MAKES PAVER-SHIELD™ BETTER THAN THE COMPETITION?**

*Paver-shield™* is not a thin veneer of color coating. *Paver-shield™* pavers are guaranteed to look great year after year, retaining their vibrant color and smooth texture. Products without *paver-shield™* may look worn and faded over time with exposed aggregate on the surface.

**DOES THE COLOR GO ALL THE WAY THROUGH NICOLOCK PAVERS?**

All Nicolock pavers have color throughout. Those manufactured with our exclusive paver-shield™ process have an extra concentration of cement and pigment on the wear layer providing deep rich colors and a smooth, dense wear layer.

**CAN I USE A PRESSURE WASHER TO CLEAN MY PATIO?**

Yes – but, as always, follow the manufacturer’s instructions carefully. Do not pressure wash your patio too strongly or too frequently as you may damage the surface of the paver.

**CAN PAVERS BE INSTALLED OVER A Poured CONCRETE BASE?**

Absolutely! Provided certain steps are taken. Care must be taken so that water does not pool underneath the pavers. Drainage holes should be drilled in large slabs and filled with pea gravel and covered with landscape fabric. Edge pavers must be restrained to keep joints from opening up.

**CAN I USE A SEALER ON MY PATIO?**

Yes – check proprietary manufacturer’s instructions and suitability for sealing concrete paver. Please note: applying sealant to paver may affect the color.
Not only do Nicolock Pavers make an attractive pool deck, but they also provide a slip-resistant walking surface. Pavers actually are better than poured concrete around pools from the standpoint that the joints will take on moisture and leave the pavement cooler under foot. Like all products that are used outdoors, lighter colors will tend to stay cooler as they reflect the sunlight. Furthermore, our Fullnose and Pool Coping Pavers are ideal for the pool’s edge. Make sure the base material around the pool is well compacted before installing pavers. Safety covers can also be installed over pavers with the use of special anchors.

**WHAT IS GEOGRID AND WHEN SHOULD IT BE USED?**

As a rule of thumb, all walls over 3’ high should be reinforced with geogrid. Geogrid is placed between the layers of block at different intervals to stabilize the soil behind the retaining wall and secure the wall face to the earth behind it. The height of the finished wall, soil characteristics, and the pressure on the wall caused by slopes, structures, and/or paved areas all affect the proper placement and lengths of geogrid.

**WILL WEEDS GROW BETWEEN MY PAVERS?**

De-icing salts should not be used on NicoStone slabs. De-icing agents of any kind are not recommended for our Nicostone line. We recommend using only sand for providing skid and slip resistance.

**WHAT SHOULD I USE TO MELT SNOW AND ICE ON MY PAVERS?**

If a de-icing product is used, Nicolock recommends using only NaCl (rock salt) and should be used sparingly, following the manufacturer’s instructions. Once ice is loosened, remove immediately to avoid buildup of the de-icing agent.

De-icing agents of any kind are not recommended for our Nicostone line. We recommend using only sand for providing skid and slip resistant.

**I’VE GOT A RAILROAD TIE WALL THAT IS ROTTING AND FALLING DOWN. WHAT CAN I DO?**

Our segmental retaining wall systems provide an excellent solution to this problem. They are strong and will last a lifetime. Nicolock offers several different wall systems to meet your needs.

**WHAT IS RECONSTITUTED STONE?**

Reconstituted Stone – is manufactured from the highest grade materials and will last for years. It is hand crafted, with molds taken from original natural stone for an authentic appearance. NicoStone products are a consistent thickness and is therefore easy to lay.

Colors – shades are subtle and subject to slight variations, especially highlighted in the weathered shades where many products are hand made to ensure a completely random, natural look. Colors will appear different depending upon the prevailing conditions such as sunlight, heavy shade or rain.

Therefore it is advisable to check the color and appearance of the actual product samples in dry daylight conditions before purchasing. Where possible, products should also be selected from the same production batch. Reconstituted stone will weather over time in a fashion similar to natural stone.

**APPLYING SLAB AND WALLSLONE COLOR**

Please note that some products have a multi-color mix where the manufacturing process means that different color percentages are likely selected from multiple pallets prior to installation. Choose from three to five different packs.

Multi-colored products are produced randomly, therefore color proportions in different slabs may vary widely.

**APPLICATION/SUITABILITY**

Unless otherwise stated, the Nicostone materials featured in this catalog are intended for use in residential landscape projects. Nicostone decorative slabs are not suitable for driveways. The manufacturer cannot accept any liability where products have been used for any inappropriate purpose.

In the unlikely event of products reaching you in a less than satisfactory condition, please contact your local distributor directly, allowing time for the rejected product to be replaced. If a complaint is raised after laying the product, Nicostone cannot accept responsibility for any defect.

**SPECIAL NOTES**

All measurements are nominal. Dimensions include the joint widths when fully installed. Dimensions/height. May vary up to 1/4” due to unique manufacturing technique. Nicostone provides only general installation guidelines, climate and soil conditions may vary by region.
Patterns, whether simple or complex, help to define a paved area and add your own personality to your project. The following are examples of popular paver patterns.
